

Schedule your trip TODAY!

Audubon Arizona's **River Pathways** program takes your students out of the classroom and into the field!

Benefits to your class include:

- **Free** standards-aligned classroom lessons that will introduce your students to Arizona's riparian habitats and wildlife, local conservation issues, and careers in resource management.

To get your **free curriculum**, visit:

<http://riosalado.audubon.org/river-pathways-0>.

- **Two Free field trips** designed to build upon classroom lessons by teaching students to collect biological data and introducing them to careers in conservation. Your first field trip will be to the Nina Mason Pulliam Rio Salado Audubon Center and your second trip will be to either the Agua Fria National Monument or Tonto National Forest, depending upon your school's location.

*A small number of transportation scholarships are available on a first-come first-serve basis. Contact Steven Prager at sprager@audubon.org for more information.

- **Internship opportunities** for your students to spend the summer working alongside Audubon biologists collecting data that will be used to protect the imperiled western Yellow-billed Cuckoo on the Agua Fria National Monument and beyond

To schedule your trip or for more information, contact Steven Prager at sprager@audubon.org or 602-468-6470 x122.
